EXPERIENCE

Car Rental Website - Freelance Web Developer [Link]　　　　**november 2023 - march 2024**
- Led a team of two in developing a responsive car rental website, ensuring seamless user navigation.
- Optimized website performance to 100%, addressing LCP, FID/TBT, and CLS issues.
- Integrated Email.js for enhanced email communication capabilities.

Frontend Developer Internship　　　　　　　　　　**october 2024 - December 2024**
- Build multiple sections for **Khambee** product, build multiple themes for a **multi page feature**, and implement a Call-to-Action (**CTA**) feature.
- The **optimization** of image handling and display, and the development of a **solution** for creating multiple themes within the same project, which results in a **smaller bundle size** and **less time** spent on theme development.

PERSONAL PROJECTS

Quick Cart Ecommerce Platform [Link]　　　　　　**october 2023 - february 2024**
- Boosted efficiency with Next.js file based routing and **pagination**, ensuring robust data management
- Developed a high-performance search feature leveraging **debouncing** techniques and **Redux Toolkit** for seamless component interactivity
- Ensured secure transactions and user authentication with Stripe and clerk.js.
- Applied HOC and Custom Hooks to improve code reusability and performance.

Movie Hub Review Site [Link]　　　　　　　　　　**june 2023 - february 2024**
- Developed a React.js-based platform with advanced design patterns for an optimal user experience.
- Enhanced performance with React Lazy loading and debouncing techniques.
- Implemented Auth0 for secure authentication and role-based access control.

Professional Portfolio Website [Link]　　　　　　　**october 2023 - march 2024**
- Showcased projects with a focus on responsive design and user engagement.
- Integrated Email.js for direct communication and achieved 100% performance in core web vitals.
